Our company is growing rapidly and is looking to fill the role of engineer specialist. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for engineer specialist

- To provide guidance and expertise in the implementation and ongoing support of complex storage, file, content or server solution installations
- Provide deep technical consultancy to the customer or prospect, which is perceived as representing real added value at their technical management level
- Maintain a specialist level of expertise in consolidated storage, file, server solutions – including LAN or SAN connectivity and host software integration
- Undertake the implementation of Hitachi storage, file, content or server solutions – including installation, configuration and integration of component software in complex customer environments
- Engage as a technical lead of project teams under the direction of the project lead lead assigned to those projects
- Be technical lead in design questions arising during implementation, configuration or problem determination with the customer and with the Hitachi account or project team
- Ensure highest customer satisfaction in complex environments delivering projects in time, budget and quality
- Undertake the role of technical lead for projects when assigned by manager
- Brief engineers undertaking implementation and support them during completion of that work
- Provide technical liaison during proposals of complex solutions delivered by Sales and Presales

- This position is most likely a 3-8 month assignment
- Knowledge of lighting calculation software (AGI32, Visual, Dialux)
- Solid academic and professional track record of accomplishment expected, along with excellent communication and problem-solving skills
- Must be a self-starter and have the ability to work with little direction
- Demonstrated leadership & teamwork skills are a must
- Must have working knowledge of all Microsoft Software applications
