

# Example of Engineer Specialist Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is looking to fill the role of engineer specialist. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for engineer specialist

- Install and troubleshoot serial and ethernet communications over fiber optic and copper cable
- Perform tasks involving AC, DC controls and analog controls
- Develop and/or update procedures related to terminal automation and terminal preventative maintenance programs
- Lead the Global Warranty process
- Responsible for the Quality Assurance support of marketed products
- Represent the customer, evaluate customer feedback and issues, monitoring for trends and determining the necessary action plans
- Assure compliance to internal Standard Operating Procedures and external standards
- Interact with and support the TSSD plant manufacturing facilities and travel to plants when necessary
- Help to drive and foster a Customer First mindset and quality environment throughout the business
- Provide technical support to customers, sales engineers, and the sales team (Tasks may include on-site support)

## Qualifications for engineer specialist

- Extensive experience with large composite structures, preferably Wind Blades

- Understanding of Active Directory, ADFS and Group Policy
- Microsoft System Center experience is a plus
- Microsoft Hyper-V experience is a plus
