

# Example of Enterprise Solution Architect Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is looking for an enterprise solution architect. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

## Responsibilities for enterprise solution architect

- Public/Private Sector experience, ideally with fortune 100 customers and all government agencies- federal, state and local
- 7+ years architecture experience in conceptualization, definition and development of IT-based products, services and solutions
- Understand business drivers and business capabilities (future and current state), and determine corresponding enterprise system changes to drive the organization's targeted business outcomes
- Design and lead the implementation of a solutions architecture across a group of specific business applications or technologies based on enterprise business strategy, business capabilities and business requirements
- Manage and develop the architecture for a broader scope of projects, working closely with application architects that manage and design architecture for a single project or initiative
- Provide consulting support to application architects within projects to ensure the project is aligned with the overall enterprise architecture
- Monitor the current-state solution portfolio to identify deficiencies due to aging of the technologies used by the application, or misalignment with business requirements
- Analyze the technology industry, competitors and market trends, and determine their potential impact on the enterprise
- Define the principles, guidelines, standards and solution patterns to ensure solution decisions are aligned with the enterprise's future-state architecture

- Develop a roadmap for the evolution of the enterprise application portfolio from future to current state (as defined by the solutions architecture)

## **Qualifications for enterprise solution architect**

- TOGAF experience required and certification is a plus
- Experience with Supply Chain tools like SCM, eWM, SNC, SRM, Ariba, GTM, QM, TMS, GTM, MM, LE, WM, IM, GTS and APO
- Experience in the Enterprise Documents domain not required, but highly preferred
- J2EE (Java) application development
- Experience with multi-tier systems and vendor integration
- Exposure to Scaled Agile Framework (SAFe)
