

Example of Environmental Geologist Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking to fill the role of environmental geologist. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for environmental geologist

- Leading tasks assigned by a project manager in keeping with scope, schedule, and budget
- May be responsible for supervision of up to 5 staff
- Support project manager with subcontract agreement drafting and execution, bid packages, and subcontractor management
- Full-time technical position involves the execution of environmental assessment and remediation project tasks
- Ability to work with team members for the completion of field assignments will be important, including the ability to conduct work within scope, schedule, quality criteria, and budget
- Knowledge of field methods for the collection and evaluation of environmental data from hydrogeologic investigations and from the design, construction, and operation of remediation systems a plus
- Field work may consist of implementing soil / groundwater sampling, drilling, monitoring well installation, well gauging, site inspections, implementation of remedial systems and installations
- Understand technical work requirements with minimal training, explanation and oversight
- Manage project and coordinating projects tasks and resources (i.e., equipment, staff)
- Supervise subcontractors, and occasionally communicate with clients and/or regulatory agency personnel

-
- Southern California area candidates preferred.
 - Bachelor's degree in Geology/Hydrogeology preferred
 - Ability to work in the field including travel and in the office
 - Field sampling experience with direct-push and/or hollow-stem auger drilling, and low-flow groundwater sampling using peristaltic and bladder pumps
 - 3 to 6 years of environmental project experience
 - Must be able to plan, perform and oversee field work
