

Example of Environmental Monitoring Job Description

Powered by www.VelvetJobs.com

Our company is looking for an environmental monitoring. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for environmental monitoring

- Provide direction and technical guidance on evaluating and troubleshooting routine and non-routine technical problems, leading deviation and issue resolution to support manufacturing investigations, overseeing method validation/transfer, and equipment/facility/cleaning qualifications
- Perform analytical review of lab work by authoring, reviewing and approving EM studies and reports
- Promote effective communication with all levels of the organization through collaboration, networking, and developing innovative methods to assure a high customer service level
- Spearhead Lean Lab certification/re-certification and provide leadership for QC process improvement projects, safety, and metrics measurement
- May assist the QC Team Lead with budgeting, resource planning and performance evaluation of staff
- Promote Thermo business for the assigned products and territory to realize AOP bookings and revenues
- Develop the account management activities for the territory to drive account expansion and penetration
- Develop and build key accounts within the pharmaceutical, chemical, iron & steel and academic sectors
- Maintain accurate and current records of proposals, opportunities, accounts, contacts, leads and actions through Salesforce.com CRM system

Qualifications for environmental monitoring

- Ability to accomplish the described duties through the use of appropriate laboratory equipment
- Expert level understanding of the Clean Air Act's emissions testing, monitoring, recordkeeping and reporting requirements
- Proven ability to diplomatically and assertively handle challenging situations with regulatory agencies, the public, or company personnel
- Proven ability to work in a geographically diverse team environment
- Aseptic processing experience and training preferred
- BA/BS in Science
