

Example of Financial Data Analyst Job Description

Powered by www.VelvetJobs.com

Our company is looking to fill the role of financial data analyst. To join our growing team, please review the list of responsibilities and qualifications.

Responsibilities for financial data analyst

- Assist management with data analysis and strategic planning to ensure long-term objectives are accomplished
- Analyze customer requests and internal data to determine global impact on existing systems processes and develop appropriate specifications, enhancements, and/or procedures to comply
- Identifies financial issues and anomalies, investigates causes and communicates to management along with providing recommendations for improvement
- Manages ongoing cellular unit reconciliation at a macro level, working with internal and cellular carrier data
- Compiles and analyzes data to prepare reports and forecast models
- Prepares recommendations of budgeted costs to be used by Manufacturing Managers during the budgeting process
- Provide proactive insightful financial analysis to enable BU/COE to reach its short and long term strategic and financial objectives
- Process monthly and quarterly commissions
- Prepare and review price/cost models
- Assist with monthly financial reporting requirements

Qualifications for financial data analyst

- A proactive problem solver skilled at taking a complex situation, distilling it down to actionable detail, and presenting a problem with recommendation simultaneously

- A self starter who is not intimidated by navigating in an ambiguous environment with incomplete data
- A demonstrated ability to achieve results and drive tasks/projects to close with minimal supervision
- Tenacious and intellectually curious - doesn't settle on easy or convenient answers, and drives issues to root cause effectively
- Familiarity with Keynote, Pages, SAP, BW, Business Objects and BPC are a plus
