Our growing company is looking to fill the role of front-end developer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for front-end developer

- A competitive salary plus benefits and Equity shares
- Greenfield projects where you get to work on the Full Development Life Cycle using cutting edge technologies
- Build entire, hand-crafted partner sites
- Optimise sites for maximum speed and scalability
- Work with implementation teams to guarantee the quality of the finished product
- Coaching, educating, and advocating front end development best practices
- Quickly generate Prototypes and development
- Leveraging APIs
- Testing and resolving performance concerns
- Building a11y and i18n ready user interfaces

Qualifications for front-end developer

- Experience interfacing directly with J2EE code
- Experience using ShadoCMS or other Content Management Frameworks
- Experience using AJAX techniques
- Experience using EXTJS techniques
- Experience and knowledge about the cool stuff in HTML5 and CSS3, and how to gracefully degrade
- Knowledge of optimizing CSS/JavaScript performance by coding practices
