Our company is growing rapidly and is looking for a front end engineer. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for front end engineer

- Evolve our Universal React/Redux front end
- Be the future of accessible web interfaces
- Expand our components library to micromanage experiences
- Deeply catered personalization of the customer's experience
- Develop and deploy new features and enhancements on iheart.com
- Propose and advocate for clean, functional design systems
- Write clean, maintainable, and testable code
- Produce responsive and cross browser/platform features
- Build reusable components and scalable architecture
- Introduce andunderstand development best practices, usability, and semantics

Qualifications for front end engineer

- Strong web development skills (e.g., Firebug, javascript optimization)
- Detailed understanding of OO programming with recent focus on modern front-end technologies
- Experience and understanding of CSS preprocessors SASS/LESS
- Understanding of Agile process and methods
- Mastery of HTML and CSS (we're all about SASS and "HTML5")
- Able to write clean and maintainable code from mock ups (use our styleguide to build features from re-usable components)
