

Example of Front End Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking for a front end. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for front end

- Update internal documentation when new tools are available for designers to use and distribute the information to web designers and their managers
- Contribute to front end build process using Grunt.js
- Oversee deployment of production code
- Create user-friendly interfaces for our clients working closely with a full-service development team
- Build and maintain reusable code and libraries for future use
- Produce effective, highly reusable/maintainable software applications by using best practices, design patterns, and OOAD methodology
- Resolve critical technical problems under pressure and significant time restraints
- Meet with clients to analyze, gather, and document user requirements
- Determine project scope and risk factors
- Prioritize multiple projects simultaneously

Qualifications for front end

- At least 2-3 years experience in HTML email coding for an e-Commerce or Retail brand
- Average to deep knowledge of email marketing best practices
- Experience communicating with an API via AJAX
- Angular (or some other JS MV* framework)
