

Example of Global Sourcing Manager Job Description

Powered by www.VelvetJobs.com

Our company is looking to fill the role of global sourcing manager. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for global sourcing manager

- For all of the above, the Advanced Sourcing team will leverage the global strategic sourcing organization managing 'current' sourcing and will ensure smooth hand-over of sourcing activities at time of product launch
- Support the Chemicals sub category strategies by connecting the need state into actionable procurement insights
- Support the Joint Strategic Partner program, by connecting the Body Need State NPD pipeline and translating into key supplier growth opportunities
- Analyze commodity related data to generate strategy and action plan to improve company financial position through the improvement of favorable purchase price variance
- Generate cost savings projects related to direct or indirect materials or services
- Coordinate the implementation of cost reduction projects with buyers, engineers, operations and other functions as needed
- Coordinate with external entities such as suppliers, other divisions, and corporate personnel, as needed, to assure smooth implementation of initiatives
- Lead commodity strategy teams that are challenged with identifying and developing a World Class Supply Base that will support manufacturing strategies, and Product Roadmaps
- Act as liaison with appropriate counsel in developing Global supply agreements to ensure protection of Intellectual Property using non-disclosure

- Develop and maintain long-term supplier relationships that will deliver competitive advantages including lowest total cost, highest quality products, and superior customer service

Qualifications for global sourcing manager

- Leads the development of Global Sourcing and Supplier annual operating plans, quarterly forecasts and/or strategic financial plans with other teams as appropriate
- Bachelor's Degree (must) Master's Degree (preferred) (Technical or Commercial)
- Proven experience with the Chemicals category and solid end-to-end Supply Chain and NPD comprehension for FMCG from a technical and/or commercial side
- Strong commercial and business acumen, coupled with the ability to understand most technical and scientific matters (preferred)
- Truly global mindset
- High level of proficiency with core Procurement and R&D Processes (preferred)
