

Example of Hazardous Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking to fill the role of hazardous. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

Responsibilities for hazardous

- Weekly report on all work associated with HW and HM (SRE Deliverable 1)
- Performs regular safety inspections and surveillances, and formal environmental and safety audits to ensure contract requirements are met or exceeded
- Evaluates violations or problems discovered during inspections to provide advice to management on implementing changes to be compliant with corporate and government EHS policies
- Reviews the site-specific EHS plans and procedures to establish validity and any need for amendment
- Investigates spills and accidents and prepares reports for submission to the customer
- Investigates personal incidents and aircraft/vehicle accidents to determine root cause and any corrective actions to prevent a repeat occurrence
- Recommends, implements, and assists in the execution of a variety of workplace safety, industrial hygiene, and safety training programs to prevent injury and occupational illness
- Coordinates safety committee meetings
- Monitors the use and storage of hazardous materials in the work place and researches the practicality of environmentally friendly alternatives
- Responsible to administer the Environmental Protection Program and the Respiratory Protection Program

Qualifications for hazardous

- Familiarity interpreting and applying requirements of global fire and buildings codes, including within Asia, Europe, and the Americas
- Solid background and ability to dissect chemical attributes of products that are key to determining storage and infrastructure requirements (construction, fire sprinklers, ventilation, electrical ratings)
- CFPS (Certified Fire Protection Specialist), PE in Fire Protection Engineering, and/or degree in Fire Protection Engineering are also good educational backgrounds for the position
- Experience in insurance may be helpful provided they have direct experience identifying and assessing fire and explosion risks related to hazardous materials at commercial and industrial facilities
- Certification and experience in dangerous goods or regulated hazardous materials compliance
- High school diploma and experience handling hazardous materials
