

Example of Industrial Painter Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is hiring for an industrial painter. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for industrial painter

- Protect and prime surfaces, as appropriate
- All responsibilities must be carried out while ensuring compliance with local occupational safety, health and air pollution control regulations including volatile organic compounds (VOC) and with all safety precautions recommended by paint manufacturers
- Use both automatic and bench style power sand blasters to remove existing rust and slag
- Self-motivated and able to complete duties beyond those specifically laid-out by supervisors
- Focused and committed to a safe and hazard-free work environment
- Accomplish additional duties put forth by the supervisor
- Application of paint, stain, varnish, enamel, and other finishes to equipment, buildings, floors and/or other structures using brushes, rollers
- Stand in for the Supervisor if and when required
- Safely perform preparation, painting, and detailing of aerospace structures under minimal supervision
- Use industrial spayer to coat metal parts

Qualifications for industrial painter

- **MUST** have experience as an Industrial Painter
- Must have experience with two part epoxy paints and airless spray machines

- Must have 3+ years experience in industrial and/or automotive painting
- Must be familiar in proper preparation of metallic surfaces and in applying urethane, epoxy, acrylic, and oil-based paints using spray guns
