Our innovative and growing company is hiring for an interaction designer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for interaction designer

- Create clickable prototypes from design compositions using inVision and Sketch
- Produce visual assets, med-fidelity and high fidelity visual studies
- Learn and apply skills in user centered interaction design
- Socialize design trends and new technology
- Work closely with marketing, development and engineering
- Communicate design rationale to internal and external stakeholders
- The designer will work on interactive design with a focus on responsive design principles, also collaborating with the user experience team and developers to create high impact digital experiences that support the business, brand and customer
- Act as a key player in the strategic design process of projects, assuming responsibility for the overall strategy and execution
- Collaborate with program, product, and project managers to gather requirements and integrate business objectives and technical constraints with customer needs
- Collaborate and lead team of interaction designers, information architects, content strategists, and researchers to define the customer experience using the appropriate user centered design techniques and methods

Qualifications for interaction designer

- Experience designing SCORM 1.2 or SCORM 2004 compliant solutions
- Experience using software for graphic development (Adobe Photoshop, Illustrator)
- Work samples are required
- Multilingual is a plus if fluent
