

Example of Lean Consultant Job Description

Powered by www.VelvetJobs.com

Our company is looking for a lean consultant. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for lean consultant

- Works to clear Lean Six Sigma standards that others can follow
- Employs Lean process methodologies in order to accomplish business objectives
- Supports discovery efforts to understand current state through collection and analysis of baseline data
- Develops effective partnerships with peers and associates
- Supports Change Management / Change Control activities
- Communicates overall progress and status throughout the project lifecycle
- Monitors and analyzes data and trends to identify potential process improvement opportunities
- Responds to business unit managers requests to enhance productivity and/or increase process efficiency
- Applies business process knowledge to help select and drive projects for continuous improvement
- Assess the performance and capability of processes and operational groups (throughput, cycle time, productivity, waste)

Qualifications for lean consultant

- Bachelors or Experience Equivalent required
- 1 – 3 years of Lean Six Sigma project-based experience required with Black Belt or Lean certification strongly preferred

- Bachelor's degree in Operations Management, Engineering or Business Administration from an accredited college or university
- Strong relationship building skills, program and project management and excellent organizational skills
