

Example of Manager, Software Development Job Description

Powered by www.VelvetJobs.com

Our growing company is hiring for a manager, software development. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for manager, software development

- Contribute to the long term product strategy and roadmap
- Make sure the team has a ton of fun
- Report on status of product quality to management, customer support and product teams via rigorous execution of detailed plans and accurate reporting of test cases executed, bugs discovered, bugs fixed
- Develop and execute against organizational and team roadmaps, goals and strategies
- Create individual employee development plans
- Your committed focus on delivering value to our customers – You do this both through inventing when necessary and simplifying when possible
- You think big
- You are an owner, but not a dictator -- you recognize that great ideas come from all directions, and you aren't afraid to encourage your team to be bold and try new things
- You also dive deep and stay connected to the details of the software and systems your team is developing
- You are a connoisseur of talent – you passionately search for top-notch talent to join your team, and you take the top-notch engineers under you and help them to develop and grow

Qualifications for manager, software development

- Working knowledge of technologies and concepts such as global systems, distributed systems, messaging, cloud deployments, automation, scalability, NoSQL
- Demonstrated experience leading successful development efforts
- Experience inspiring and motivating people to fulfill their potential
- Ability to promote teamwork and establish a foundation of trust among team members and an understanding of, and enthusiasm for, SCRUM management techniques
- 8+ years experience in software development and delivery
