

Example of Medical Lead Job Description

Powered by www.VelvetJobs.com

Our company is looking for a medical lead. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for medical lead

- Providing peer-to-peer responses to unsolicited medical information queries from practicing Oncologists and other health care providers
- The individual in this position will be responsible for currently marketed oncology products those in late stage development
- This individual will develop and review scientific publications, be responsible for investigation of safety issues and examination and assessment of licensing and acquisition opportunities
- He or she will ensure the appropriate use of all Janssen Biotech marketed products for oncologic diseases
- Provide clinical analysis and promulgate scientific and clinical support for appropriate use of Janssen Biotech products for oncology
- Support the development and execution of company sponsored Phase IIIb and IV clinical trials, assessment and supervision of Investigator Initiated Clinical Research
- Support the oncology business in the development of compliant promotional materials and the training of product representatives
- Collaborate with R&D teams in the evaluation of new molecules for the treatment of oncologic disease
- Maintain relationship with external investigators and opinion leaders
- Design and conduct Advisory Boards

Qualifications for medical lead

- As needed, provide Medical review to US promotional and non-promotional materials
- 8-10 years of related work experience in industry, in clinical or research institution, preferably in Genetics, metabolic, or hematology
- Experience in medical affairs particularly rare
- 5-7 years consulting experience, most especially in leading projects
- Solid consulting experience in Health & Welfare plan design, Retirement plans and/or service delivery/technology solutions including best practices, marketplace providers, cost and return on investment issues, pros and cons of solutions, challenges and methodology regarding solution implementation
- Strong organizational abilities and flexibility to work in a performance driven environment
