

Example of Multimedia Developer Job Description

Powered by www.VelvetJobs.com

Our company is searching for experienced candidates for the position of multimedia developer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for multimedia developer

- Tests new multimedia technologies and evaluates educational applications
- The CP RTC multimedia team is seeking a highly motivated, versatile technologist to join our application development team and help us move forward our real time collaboration platform strategy through the continued development of our solutions, frameworks and technologies
- The candidate for this development role should possess a minimum 2+ years of experience in developing server side and/or user facing applications
- As such a working knowledge of platform specific programming frameworks and languages like Java is beneficial in addition to common processing patterns
- The candidate should be able to demonstrate an understanding of the SDLC process, testing and the common tools used to manage the delivery of software from development to production
- Coordinates and performs technical duties in production of video broadcasts, podcasts, streaming and other field and/or studio productions to ensure seamless sequencing of images and sounds
- Operates video editing equipment
- Designs, creates, delivers and modifies multimedia and web-based graphics, video and sound elements
- Support the ETX team by creating various assets for the ETX learning experiences with multimedia and web-based graphics, video and sound elements

Qualifications for multimedia developer

- Must have an in-depth understanding of TCP/IP, UDP and including multicast
- Proficient in the Creative Suite Master Collection (Photoshop, Illustrator, Bridge, InDesign, Flash, Dreamweaver, Acrobat, and Photoshop Lightroom), Flash MX and Studio MX
- Proficient on Mac or PC
- Skill in preparation of course material for all training modalities (written manuals, online content)
- Project management skills, including scope definition, risk assessment, estimating, and reporting
- Proficient with authoring, design, and development tools and technology, programming languages and applications related to training development
