

Example of Network Developer Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking for a network developer. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for network developer

- Become trusted advisor to Sales to act as the enabler to the Nordics Direct and Channel teams, whilst managing enthusiastic partners expectations for direct engagement
- Deliver local marketing activities according to the EMEA plan and work with the Nordics marketing team to support local events, speak at them and also potentially do booth duty at shows
- Contribute to and extend the S/4HANA Cloud SDK with new concepts and technologies
- Support development teams to build their own applications on SCP using the S/4HANA Cloud SDK
- In the job position you're supporting the execution and management of study projects on the analysis and planning of electrical power supply networks
- Technical involvement in virtual, multi-cultural project teams is also part of the job
- Furthermore, you'll be responsible for the management of customer contacts
- You will be supporting the proposals and sales activities of network studies and network consultancy opportunities
- Part of the job is traveling to customers in order to foster our relationship
- Working with Product Management and the sales team, identify prospective partners for the French region

Qualifications for network developer

- Experience with programming languages such as Java or VHDL
- Knowledge of networking concepts and/or RF systems
- Applied programming skills in at least one programming language
- Experience with frontend frameworks such as React, Ember, Polymer or Angular
