

Example of Network Implementation Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking to fill the role of network implementation. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for network implementation

- Responsible for project set up for Network sponsored projects within the technology systems of record (Nexus, Maximo)
 - Responsible for managing technology design integrity with varying levels of complexity from implementation to operational turn-over, and/or may have broad scale accountability for those processes that support initiatives
 - Provide guidance and support for all Retail Branch/Private Banking and Commercial Banking Network Reconfigurations
 - Create, update and contribute to critical documentation relevant to branch consolidation
 - Develop plans, and schedules with colleagues to provide progress updates to stakeholders (both national and regional)
 - Provide support to cross functional project team members including senior Regional support
 - Champion the ongoing exchange of information and best practices between Regional and National Offices teams
 - Identify and escalate any changes which impact current PND Implementation processes
 - Ensure compliance with FCAC and regulatory group for each project when applicable
 - Identify potential opportunities for project risk and implement mitigation strategies
-

- Five to seven years of experience in deployment, implementation and/or installation of enterprise hardware
- Two to three years of experience in circuit provisioning and/or network operations
- Able to communicate across intra and inter-company boundaries stating requirements needed in support of customer requirements
- Apply technical expertise to a variety of situations, evaluating problems and implementing best solutions
- High degree of personal motivation and proven ability to work independently with little supervision in order to resolve customer or technical issues
- Proficiency in creating diagrams in Excel and Visio
