

# Example of Node JS Developer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is looking for a node JS developer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for node JS developer

- Use Javascript and NodeJS to improve APIs
- Develop full stack applications that are scalable, robust, and thoughtfully designed
- Full software development lifecycle, from design to implementation
- Ship production code to a large customer base, and will take full ownership of your work, including testing and deployments
- Collaborate with other software engineers, domain experts, and end-users, to build the right solutions that address our business needs
- Oversee the design, scoping, implementation, and testing in short agile release cycles
- Interface with Software Quality Assurance and deployment teams
- Identify and implement technical innovations to improve work processes
- Work closely with the lead developer and users to assure that business requirements are accurately represented in design and implementation phases
- Receive direction from various business divisions

## Qualifications for node JS developer

- Knowledge of UI best practices
- Strong knowledge of Java tools and IDEs such as Eclipse and Maven
- A deep understanding of user-centred product development methodology

- 1+ year of experience with Node.JS in a professional setting
