

# Example of Owner Product Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is growing rapidly and is looking for an owner product. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

## Responsibilities for owner product

- Prior experience of software development desirable, particularly in an agile environment
  - Build relationships with stakeholders across the business and ensure that you understand their role, the needs of their area, and that their requirements are considered in the backlog
  - Collaborate with delivery teams, making product functionality decisions that deliver the maximum amount of business value into products
  - Demonstrate/develop an excellent understanding of the product, business and market in order to help prioritise the backlog based on business value and return on investment
  - Ensuring that the Product Backlog is visible, transparent, and clear to all, and shows what the Scrum Team will work on next
  - Provide clear requirement and technical clarity to the team
  - Work with a dedicated Product Manager to execute the vision for your product group
  - Work with the project management office (PMO) to break the annual roadmap into a project plan with milestones so you deliver products and features on time and on budget
  - Own and drive the requirements for your product area, including the user flow and website design, data/tracking requirements, admin tools, services/APIs and overall usability
  - Serve as a Product Owner for a dedicated scrum team
-

- Masters Degree in Business Management, Process Management, Project Management, Risk Management, Communications, Computer Science or Information Systems
- Develop product proposals for backlog
- Prioritized list of strategic capabilities and services by region or country
- Identify dependencies
- 7+ years' experience in large scale project management, vendor management, contract management, and budget management
- Strong understanding of Intranet systems and integration with back end systems
