

Example of Owner Product Job Description

Powered by www.VelvetJobs.com

Our company is hiring for an owner product. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for owner product

- Review Sprint burn-down/up graphs, cumulative flow diagrams, and other information sources showing the health of the team or sprint
- Liaison between internal and external stakeholders
- Helps create user stories and acceptance tests from themes and features granular enough for a single sprint
- Provide iterative feedback on development activities
- Accepts or rejects outputs from development through deliverable review at the end of every sprint
- Provides progress reporting and communication to interested stakeholders related to sprint and release statuses
- You will Translate product roadmap into manageable product backlog and documents the epics/stories
- You will Define High Level Designs and specific user stories/requirements to the Focus Team
- You will Work with R&D to agree on solution approach
- You will Support Focus Teams during sprints (business clarifications, adjustments for risk, reprioritizations, changes in scope, approving 'done' stories)

Qualifications for owner product

- Bonus Program that pays up to \$20,000!

- Software company experience
- Bachelor's degree in Computer Science, Computer/Electrical Engineering or related field
- 4+ years experience working at different levels in a product development organization
- BS or BA in a related field or relevant experience
