

# Example of Partner Engineer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is searching for experienced candidates for the position of partner engineer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for partner engineer

- Manage data pipelines for product features such as app suspend and disk cache and other partner integrations
- Integrate third party data to enrich our data environment and enable new perspectives
- Strong experience with Node.js in production
- Experience with distributed systems and AKKA
- A strong background writing RESTful APIs and websocket interfaces
- You are experienced with messaging services like Kafka, ActiveMQ, or RabbitMQ
- Strong experience with cloud computing platforms, like Amazon Web Services (SQS,SNS), Docker, Mesosphere
- Provide technical leadership and support for partners in their sales cycles
- Support, monitor, and/or perform solution evaluations and Proofs-of-Concept in partners' opportunities
- Build community of technical champions within the channel landscape

## Qualifications for partner engineer

- You enjoy the challenges of working on software targeted at new and emerging markets
- You know what's important when releasing software to partners - ideally, you have worked as a software developer producing as well consuming an SDK

- Deep understanding of set-top box and MVPD space is a big plus
- You enjoy using multiple JVM languages (Scala, JavaScript, Groovy)
- You are skilled with databases (SQL / NoSQL)
