

Example of Product Management Manager Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking to fill the role of product management manager. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for product management manager

- Lead and communicate with cross-functional departments
- Experience in shipping complex, technical products
- High comfort with ambiguity and unsolved problems
- Experience at a well oiled agile shop (and/or startup) a plus
- Passion for or experience in fintech a plus
- Continuous learning budget [Meet Marty Cagan in person]
- Work with product, design and engineering leaders to convert the product vision into a well managed development roadmap with a set release cycle
- Brainstorm effectively with various stakeholders to continuously define feature priority
- Help your team ship products by making difficult tradeoffs, removing roadblocks and providing clear acceptance criterion
- Document input from various stakeholders and bring the voice of the customer to those conversations

Qualifications for product management manager

- Lead a highly dynamic and multi-disciplinary team to conceptualize, develop and enhance web products
- At least 3 years' experience in translating business strategy and analysis into successful consumer products

- Project Management Professional Certification (PMP) or equivalent work experience
- SLQ2CQ or Business Process Management Certification (BPM)
- Broad technical knowledge of application and system architecture, network and infrastructure architectures and technology, object oriented languages and web technologies
