

# Example of Program Developer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is growing rapidly and is hiring for a program developer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for program developer

- Represent JBU on new and existing System Operations, Crew Services and Dispatch program teams
- Provide subject matter expertise of system operations functions to the JBU Colleges and the JBU Learning Design team
- Work with COS Leadership on the requirements and implementation of a training plan for new and existing programs
- Review regulatory requirements for new and existing regulated training programs and manuals
- Serve as a liaison to other JBU Colleges when program objectives impact their operational areas
- Support the development, evaluation, revision, and enhancement of training curricula and courseware
- Advise in the development of manuals and training presentations
- Conduct needs analyses and training feedback evaluation
- Facilitate classes and develop curricula, individually and as a team contributor
- Assist with providing OJT instruction, when requested

## Qualifications for program developer

- Programming skills, for example Web-scale IT, mobile applications or enterprise cloud applications
- Modern development methods, such as 12-factor, lean/agile, micro service

- Understand the scope of VDP services in depth, and become a subject matter expert for both internal and external stakeholders
- Develop client-facing materials for briefings, and support sales and socialization activities
- Provide inputs for defining and prioritizing key clients, partners and markets for initial trials
- Assist in operationalizing the VDP implementation support structure for AP, working in concert with Product, Technology and Client Support Services among other teams
