

Example of Revenue Management Analyst Job Description

Powered by www.VelvetJobs.com

Our growing company is looking for a revenue management analyst. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for revenue management analyst

- Leverage available tools (POP, IRI, Margin Minder) and other customer-specific information to drive DPS strategies
- Provide monthly analysis and critique to key stakeholders, including State of the Business updates, Forecasts, Pace trends and Market Share trends
- Provide support and help maintain Analysis tools and develop analysis to identify revenue opportunities and analyze performance for transient and group segments
- Provide Cargo sales managers with guidance on short and long term contracts promotion and spot rates to maximize cargo revenue and profit margin
- Posts payments for WGLE Handbills and other accounts
- Tracks and audits customer payments posted by Customer Care center
- Provide customer- and WD-specific performance reporting as needed
- Research, analyze, validate, and prepare data for use in monitoring and reporting, strategy support, and special projects
- Establish metrics, identify trends and make recommendations
- Create and maintain custom reports and/or data files

Qualifications for revenue management analyst

- Experience solving large-scale problems and familiarity with the airline

- Working knowledge of SAS, R, Python, Java, or other relevant programming languages is also preferred
- Ability to manage multiple priorities across various cultures and time zones with internal and external partners
- Aptitude for problem identification and resolution including securing inter-departmental and intra-departmental cooperation
- Interest in optimization, economic game theory, and consumer buying behavior
- Experience with SQL, SAS strongly preferred
