

# Example of RN Wound Care Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is looking for a RN wound care. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

## Responsibilities for RN wound care

- Performs specialized care for a specific patient population demonstrating advanced technical/clinical skills in caring for a specific patient population
- Develops an individualized plan considering patient characteristics and the situation (age- and culturally-appropriate care, environmentally sensitive)
- Collaborates with health team members to validate comprehensiveness of patient's interdisciplinary plan of care
- Considers associated risks, benefits, costs, current scientific evidence, and clinical expertise when formulating expected outcomes
- Synthesizes available data, information, and knowledge relevant to the situation to identify patterns and variances
- Develops the plan of care in conjunction with patient, family, and others, utilizing community resources and systems as appropriate
- Incorporates an implementation timeline within the care plan
- Uses health promotion and health teaching methods appropriate to the situation and the patient's developmental level, learning needs, readiness, ability to learn, language preference, and culture
- Evaluates the effectiveness of the planned strategies in relation to patient responses and the attainment of the expected outcomes
- Provides evaluation of nursing actions based on descriptive and theoretical literature

## Qualifications for RN wound care

- BCLS upon hire
- Associate's of Science in Nursing degree from an accredited school of nursing required
- Five (5) years of recent experience as a wound care nurse preferred
- Valid State license as an RN
