

Example of Robotics Technician Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is searching for experienced candidates for the position of robotics technician. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

Responsibilities for robotics technician

- Maintain and develop machine programs, part definition (PD) files and machine set-ups
 - Optimize machine programs and set-ups to meet or exceed theoretical product run-rate
 - Observe machine and line performance and determine the necessary steps needed to achieve optimum line efficiency and product quality
 - Recognize, analyze and correct automation related equipment issues
 - Determine when necessary machine repairs are needed and perform out-of-cycle maintenance
 - Perform 'as-required' preventative maintenance of equipment on assigned line(s)
 - Assist Machine Operators on assigned line(s) by providing ongoing training and direction
 - Assist with machine operation in order to expedite changeover, cover breaks, or otherwise improve line efficiency
 - Interface with Line Supervisors, Manufacturing Engineers and Manufacturing Managers to determine corrective actions needed, and be the front line person in ensuring that assigned line(s) performs with the maximum efficiency and product quality
 - Assist Manufacturing Engineers in achieving optimum process performance by measuring and / or optimizing of reflow profiles, wave solder profiles, and screen printing of solder paste
-

- 2 to 4 years of experience in a hands-on Electro-mechanical environment
- Able to provide training when required
- Fieldbuses
- OHS Training
- Available for guards when appropriate
- Availability to travel around the world and to work on nights, holidays and weekends
