

Example of Security Management Job Description

Powered by www.VelvetJobs.com

Our company is searching for experienced candidates for the position of security management. To join our growing team, please review the list of responsibilities and qualifications.

Responsibilities for security management

- Establish long-range security goals, define security strategies, metrics, reporting mechanisms and program services
- In conjunction with other stakeholders, develop, implement and maintain department policies and standards designed to maximize effectiveness and minimize costs related to the acquisition, implementation and operation of enterprise applications and infrastructure systems in a secure manner
- Educate EIS employees on security policies, changes to regulations and their responsibilities
- Manage the Information Security Identity Management team and associated systems and applications
- Assess the current federation and authentication environment and make continuous improvements for alignment with future state architecture
- Ensure regulatory requirements and industry best practices are followed
- Integrate IAM systems with in-house applications, third party applications and SaaS applications for provisioning, identity authentication, and developing connectors between IAM tools and system resources
- Work closely with Identity Access Management (IAM), Security Operations, Risk Management, Application owners, and Product managers to drive the identity strategy
- Drive the Privilege Access Management strategy and manage the PAM technology deployment and support
- Work with vendors and third parties to evaluate new products, features and solutions

-
- Degree in Information Security with a minimum of 5 years in the relevant field
 - Strong interest in cyber security, and constantly updated with the latest cyber security events, trends and conferences
 - Exceptional written and verbal communication and presentation skills necessary to work with cross-enterprise and cross-functional teams
 - Key contributor in initiating new processes for managing security compliance in the account
 - Minimum of Bachelor's degree or international equivalent
 - Extensive years of related experience required including either law enforcement, preferably federal, and/or corporate security, with demonstrated understanding of cyber security issues, preferably within a large digital company
