

# Example of Senior Application Architect Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is looking for a senior application architect. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for senior application architect

- Provide senior design and development support for the VisionPLUS credit card application system, in particular the FAS system and scheme compliance
- Lead the Integration solution design and implementation of Partner Hub
- Partner with third-party vendors and MTSE staff to create the solution design of the Agent 360 platform, providing leadership in the integration design and implementation
- Serve as the central point of contact for all Integration issues related to the Agent Life Cycle Management
- Act as an advisor to the Solution Engineering team on ways to exploit integration technologies
- Participate in the planning and development phases of long-term enterprise system projects
- Conduct analysis of user requirements and cross-functional group requirements
- Define system objectives and prepare system design specifications to meet requirements
- Present clear technical solution alternatives and options to Project Manager and service delivery and business partners
- Translate and present solution design to all stake holders to ensure the design will meet the business requirements

- Experience on the cloud ecosystem tools and system level DevOps tools is a plus
- 5+ years of practical experience with relational database or NoSQL database
- Significant experience with at least one Java Web Development Framework
- Well versed in Enterprise Architecture and Custom development Service Oriented Architecture (SOA) utilizing J2EE and/or .NET architecture
- Fluency in Web Services standards and technologies (e.g., XML, SOAP, WSDL, XSD, UDDI)
- UI architectural frameworks in support of Responsive Web Design
