

Example of Senior Cloud Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking to fill the role of senior cloud. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for senior cloud

- Assist in preparing cost analysis based on expected usage
- Configure multi-factor authentication on virtual and hardware devices
- Train and mentor Junior Administrators and Engineers
- Be involved in the build of our new cloud services that span IaaS and PaaS, and maybe some SaaS styles
- Interface with multiple business units to help build our cloud and ensure consistent adoption of the tech
- Be challenged and expected to act as a change agent in our culture championing DevOps principles and practices
- Be a technical expert to help customers consume standard cloud services and tech that's a right-fit and balance between business goals and cloud offerings
- Work across multiple, global teams and participate as a collaborative partner
- Designs, builds, tests, deploys, analyzes, administers, monitors and maintains 24x7 Cloud-based service
- Researches and recommends the procurement and use of Azure Cloud-based infrastructure services

Qualifications for senior cloud

- AWS (ELB, EC2, S3, RDS, CloudFormation, Security Groups)
- Ability to troubleshoot Cisco hardware issues, understand alerts, and log analysis

- VMWare vSphere administration, both GUI and CLI is a must
- Understand and troubleshoot cluster errors (DRS/HA/vMotion/svMotion)
