

Example of Senior Cloud Job Description

Powered by www.VelvetJobs.com

Our growing company is searching for experienced candidates for the position of senior cloud. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for senior cloud

- Provide techno-functional leadership for the services provided for projects using hybrid clouds, cloud migration, and the implementation of cloud management platforms (Rightscale, VMware, vRealize or Dell Cloud Manager)
- Be Familiar with ITIL processes for IT Service Management
- Lead the design, planning and implementation of complex IT infrastructure solutions
- Work closely with the client to establish infrastructure strategy
- Translate the client's business requirements into systems design, including high-availability and disaster recovery
- Establish high and mid-level project plans
- Lead risk and estimation efforts
- Manage performance and capacity issues / risks
- Working with product and offer managers, customers, partners and sales teams, acting as a consulting and determining requirements for migrating existing solutions to the cloud or the creation of new cloud-native ones
- Researching, experimenting, prototyping technologies and concepts necessary to deliver a successful cloud strategy

Qualifications for senior cloud

- Team player, positive attitude, passion to succeed
- AWS, Azure and Openstack technologies

- 12+ years of software development experience with at least 5 years in an architect or senior technical leadership role on highly scalable and highly available Cloud based solutions
- Demonstrated ability to work with OpenSource (NoSQL) products that support highly distributed, massively parallel computation needs such as Hbase, CloudBase/Acumulo, Big Table
- Hadoop/Cloud Systems Administrator Certification
