

Example of Senior Consultant / Manager Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking for a senior consultant / manager. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

Responsibilities for senior consultant / manager

- Architect and design high quality solutions to meet project requirements using AWS services
- Act as a technical liaison between project, security, Devops and service desk teams to ensure that solutions are secure, reliable and easy to maintain
- Work directly with the Devops team to ensure that projects are successfully delivered using Devops approaches and toolset
- Directly collaborate with business development teams to promote and evangelise AWS solutions in the consulting and project teams
- Educate teams on the value proposition of AWS, and participate in deep architectural discussions to ensure solutions are designed for successful deployment in the cloud
- Ownership of a portfolio of audit analytics clients, reporting to the regional audit analytics lead
- Managing a small team within the wider Midlands Technology Risk & Controls team, including developing the skills and confidence of junior staff
- Working with audit teams in the Midlands to integrate analytics more deeply into the external audit approach
- Understand and define the business problem by conferring with clients
- Client handling and project management skills

Qualifications for senior consultant / manager

- Are flexible and willing
- Are passionate about development – of themselves and others
- Seek to collaborate
- Though not expected to have performed all roles, candidates will be expected to have knowledge and hands-on experience of roles across all phases of the project lifecycle, from initiation and requirements gathering through to implementation
