

Example of Senior IOS Engineer Job Description

Powered by www.VelvetJobs.com

Our company is searching for experienced candidates for the position of senior IOS engineer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for senior IOS engineer

- Create modular user interfaces that work on iOS and Android
- Introduce and create design patterns that help us write better code
- Develop native applications using iOS SDK / RxSwift
- Implement requirements on iOS apps
- Create, maintain and organize test cases into logical suites for automated execution, working with developers, product owners and developers
- Communicate proactively and on time with managers and development team
- Working with business partners to define our mobile roadmap as we explore new devices, operating systems, and screen sizes
- Crafting secure and scalable solutions for a mobile-concurrent environment
- Propose innovative tools, frameworks, automations and processes that are used by the mobile development team
- Mentor team members in different locations to promote engineering excellence

Qualifications for senior IOS engineer

- 5+ years of experience developing in a complex, compiled OO language (Objective-C, C++, Java)
- Fluency in Objective-C and familiarity with Apple frameworks
- Strong CS fundamentals including data structures, algorithms, concurrency, and memory management

- Experience using Instruments for debugging and performance tuning iOS applications
- Possess an intimate knowledge of HTML, CSS, and JavaScript
