

Example of Senior Oracle Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is hiring for a senior oracle. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

Responsibilities for senior oracle

- Create and perform unit testing of all code developed
- Actively collaborate with multiple stakeholders in an agile environment across the business
- Must be able to work in an Agile, fast paced, enterprise environment
- Define requirements by analyzing current business processes and facilitate "to be" process design
- Coordinate the activities related to running production/test/development Application environments
- Perform analysis on DBMS to support transition to new business
- Ensure all aspects of DBMS Disaster Recovery (DR)
- Provide technical leadership to our Oracle Commerce production support team to triage, resolve, and conduct RCA on Sev 1 and Sev 2 incidents that our clients' sites experience
- Understand client implementations thoroughly in order to diagnose site issues and respond rapidly with solutions
- Oversee the team of Production Support engineers, both in the U.S. and globally, to ensure they are familiar with best practices for support delivery and following team protocols

Qualifications for senior oracle

- Self-directed team leader with strong ability to work independently with minimal supervision
- Ability to understand business concepts and evaluate the impact of business

- Strong computer skills including Microsoft Office suite and Visio
- Proficiency in Spanish, Portuguese, or Hindi is a plus, but not necessary
- Minimum five years professional experience in support of Oracle eBusiness Suite applications or as a "super user"
