Our company is growing rapidly and is looking for a senior oracle. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for senior oracle

- Install and configure Oracle 12c instances in both dedicated, consolidated, RAC, and Exadata environments based on Configuration Standards
- Given physical data models, build database objects per standards
- Provide guidance with physical database design for large volume EDW platforms including ETL architecture, data retention (purging / archiving), and loading
- Work with System Admins to apply regular maintenance and critical patch updates and maintain security compliance
- Use Oracle and 3rd party tools to troubleshoot and resolve production issues
- Partner with offshore DBA resources and thoroughly document processes to ensure successful task implementation
- Provide 24/7 Incident Response to database alerts from production monitoring tools and Command Center personnel
- Maintain the integrity of data within the production environment including the execution of proper backup and restoration policies and procedures which provide point-in-time restore capabilities
- Enhance site / Oracle Gateway monitoring to improve high availability, performance SLAs, and proactive Health Checks
- Deploy database changes in strict accordance with ITIL change management policies and procedures -- maintain Configuration / Security Standards

## Qualifications for senior oracle

- Understanding of relational databases and proficiency with TOAD/SQL or comparable tool
- Ability to troubleshoot effectively by creating SQL queries
- Prior experience in Finance and Accounting environment is a strong plus
- Excellent troubleshooting and problem solving skills in-depth knowledge of Oracle Applications in the global environment
- Excellent customer service skills working in the global multi-cultural environment
