Our company is growing rapidly and is looking for a senior product owner. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for senior product owner

- Build business cases for new features and conduct impact analysis as requirements emerge
- Effectively present issues and potential solutions amongst stakeholders to remove roadblocks and accomplish organization objectives
- Collaborate with the Agile Team in just the right way to clarify requirements, make timely decisions on execution details, and push for increasingly impressive results
- Work with other Product Managers to ensure dependencies are prioritized appropriately across teams
- Mentor more junior Product Managers to improve agile approaches and develop a stronger team
- Inspect completed work against requirements, customer needs, and business needs
- Challenge assumptions and direction from business stakeholders when their needs are not technically achievable
- Research and understand market requirements and trends
- Lead and champion digital product strategy and roadmap in collaboration with key internal external partners
- Continue to drive innovation and value for the OPEN Forum user

Qualifications for senior product owner

- 10+ years of Business Analyst/Product Owner work experience

- Familiarity with Continuous Improvements and Six Sigma lean principles
- PMI PMP, CSM certification
- You will be great at problem solving and a confident multi-tasker, have an inquisitive nature, and be a self-learner
