

Example of Senior Technical Product Manager Job Description

Powered by www.VelvetJobs.com

Our company is searching for experienced candidates for the position of senior technical product manager. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for senior technical product manager

- Work with early-adopter and visionary 3P Sellers to invent the next set of customer-centric solutions
- Validate the Platform technology on various public clouds, identify gaps and define requirements that are needed to enable customers to deploy and manage their solution in a multi-cloud environment
- In collaboration with Engineering, define a detailed, rolling 4-quarter product roadmap based on the product strategy and drive the alignment of key releases to deliver on the roadmap
- Meticulously think through every aspect of the overall customer experience, putting users' needs first in the definition of requirements
- Set the vision for new customer experiences across the Kindle reader ecosystem, in partnership with our UX and engineering teams
- Know our customers, their challenges, and how they deal with those challenges today (including through competitive products)
- Understand complex business problems, apply strong analytical skill, use technology to solve problems and create an effective strategy
- Work directly with actual users of your products to understand their needs
- Work with business partners and external parties (suppliers, standard bodies, 3rd party partners)
- Partner with key stakeholders to identify opportunities to best serve our users

-
- Prior product release management experience is a plus
 - Demonstrated history of managing complex projects
 - Working knowledge of SAP Hana and familiarity with the SAP applications portfolio
 - Experience guiding cross-functional teams
 - Understanding of enterprise-level server and application environments
 - Work with engineering to set strategy, define the product, and make the hard, high-judgment trade-offs between functionality and time-to-market
