

Example of Senior UX Researcher Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is searching for experienced candidates for the position of senior UX researcher. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for senior UX researcher

- Work with the Lead Researcher to develop a research strategy and roadmap to support the product development process
 - Assist product managers and UX designers with user research preparation and facilitation activities
 - Synthesize research data into actionable design opportunities and strategic recommendations to support project objectives and business goals, including writing reports and delivering presentations
 - Plan and conduct practical and impactful research throughout the entire product cycle, including usability sessions, field research, user interviews, and other qualitative methods
 - Lead and facilitate collaborative stakeholder workshops to identify opportunities based on research insights
 - Organize and maintain an archive of research activities, results, and insights that can easily be shared with product stakeholders and the user experience team
 - Cultivate user empathy by translating research into compelling stories of how users of our solutions think, feel and behave
 - Collaborating with UX team to ensure alignment to research strategy and cross-train UX designers on research best practices
 - Be an evangelist for user research
 - Work closely with product and development teams to identify research topics
-

- 5-10 years' experience as a UX Researcher / Usability Field
- Passionate about mobile products and technology
- Ability to rapidly perform usability tests to get feedback to the design and product teams
- At least 5 years experience conducting qualitative research
- A BS or MS degree with an emphasis in HCI, Human Factors, Cognitive Science, Cognitive Psychology, Psychology, Computer Science, or related discipline
- Minimum 4-6 years of UX research experience in the web, mobile and/or software industry
