

Example of Software Engineer Staff Job Description

Powered by www.VelvetJobs.com

Our company is looking for a software engineer staff. To join our growing team, please review the list of responsibilities and qualifications.

Responsibilities for software engineer staff

- Mentor and coach teammates
- Partner with technical operations to build in scalability and operability into every aspect of the platform architecture
- Partner with QE to ensure quality and testability of platform architecture
- Work with Product Management to scope, plan and provide LOE estimates for new features
- Direct the design and architecture of the existing system
- Think beyond “web pages”, and consider the entire system domain, including background jobs, workers, queues
- Designing RESTful endpoints (including HATEOAS)
- RabbitMQ/Workers for backend processing systems
- Subsystems to integrate with multiple inventory suppliers and fulfillment systems
- Order placement and processing for an enterprise ecommerce application

Qualifications for software engineer staff

- 9+ years of software engineering experience including a successful track record developing customer-facing SaaS products
- Ability to work across the various technology layers in a web app – UI, Server, or DB with an emphasis on the server-side technologies
- Strong experience with Spring Framework and JSF
- Deep understanding of O/R mapping concepts and tools (Hibernate, JDO)
- Fluent in SQL (Oracle experience preferred)
