Our innovative and growing company is looking to fill the role of software integration. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for software integration

- Write test and documentation to ensure the quality of the integration flows
- Advise on best practice approaches
- At least 3 years of experience in IBM Integration Bus and/or IBM WebSphere Message Broker Experience
- Knowledge of SOAP Web Services
- Knowledge of RESTful API
- At least 3 years of experience in Linux environment
- Knowledge of ESQL and Java programming language
- Develop new software solutions to automate existing manual processes
- Work with development and testing teams to deploy tools
- Help maintain and organize various department/company tools, data files and related KPIs

Qualifications for software integration

- Experience with virtualization technologies, like VMWare or KVM
- Experience with version control tools, like GIT, GitHub, SVN
- Experience with network monitoring systems (such as VRealize or New Relic)
- Experience with Cloud Infrastructure is a plus (experience with AWS is desired)
- Expertise with database technologies, especially with ElasticSeach and Mongo
