

# Example of Software Intern Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is hiring for a software intern. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for software intern

- Understand the requirements for creating Enterprise solutions targeting verticals such as Field Mobility, Retail, Health Care and Warehouse Management
- Work in the Agile development environment to plan and execute prioritized tasks in sprint intervals
- Understand customer use cases and help develop system test cases
- Design solutions applications with experienced architects and developers
- Develop code, perform unit testing and create documentation for internal and external users
- Discuss the progress and blocking issues with the scrum team members in daily stand-up meetings
- Demonstrate your accomplishments to the scrum team at the end of each sprint
- Document the software architecture of the AVANT, InflytCloud and Connectivity products
- Communicate the software architecture and design to other engineers and management via presentations and design documentation
- Recommend and develop architectural and detailed design patterns that can be used by other members of the development teams

## Qualifications for software intern

- Work with project team to meet scheduled due dates, while identifying emerging issues and independently perform assigned tasks
- Bachelor's degree in business related discipline preferred
- Experience in C#, .NET coding skills preferred
- Live in or near Austin, TX so that candidate can work part time throughout the academic calendar year
- Must be pursuing a Bachelor Degree in Electrical Engineering, Computer Science, Computer Engineering or related field
