

Example of Solution Architect Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking to fill the role of solution architect. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for solution architect

- Contribute innovative ideas and perspectives to develop new technologies, solutions and platforms by understanding the business processes and challenges that impact our business partners
- Drive continuous improvement of the RQS IT Landscape towards optimizing technology investments
- Understand current regulations and keep up to date with these changes towards driving effective IT solutions and strategy for IT solutions
- Create documentation and visual representation of the end-to-end solution architecture for IT solutions
- Contribute to business strategy and technology roadmaps and drive Phase Zero initiatives from a technology and solution perspective
- Supports business case development and benefit identification and benefit realization (including benchmarking and KPI development)
- Drive the deployment of the customers' workloads into Azure and increase their consumption of the platform by providing deployment guidance
- Supporting development of the customers' cloud adoption model, and providing appropriate recommendations to overcome blockers
- Influence and develop Customer Project Opportunity
- Bring a differentiating value proposition to the customer

Qualifications for solution architect

- Experience with software development methodologies, agile practices, successful teamwork and production deployments in a high volume environment
- Ability to lead, help shape and influence solution design and development
- Business Architecture/Business Analyst experience
- Aptitude to balance short-term versus long-term strategic actions
