

Example of Solution Architecture Job Description

Powered by www.VelvetJobs.com

Our growing company is looking for a solution architecture. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for solution architecture

- Develop, coach and provide oversight to the solution development team (employees and contractors) on best practices relating to solution design including adherence to solution and technical architecture, interpreting functional requirements, documenting and reviewing technical specifications, developing technical test standards and plans
- Work with contracted service providers to manage and measure contractor performance to contracted terms
- Proactively engage with Mosaic IT Solution Managers in the Operations Portfolio to identify opportunities to leverage IT custom developed applications that advance business strategies and improve business performance
- Works with Operations, Technical Services and Security teams to stay abreast of latest trends in the development, mobile application and user experience areas—ensuring Mosaic custom developed application solutions are aligned with best practices and are sustainable
- Lead Operations Portfolio Services in constructing and maintaining a roadmap of internal capabilities enabling the support and solution delivery of Mosaic's business operations
- Ensures team is providing tier 3 application support per service level agreements
- Provide content for sole-source bids
- Provide technical Write Ups
