

# Example of Solution Architecture Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is hiring for a solution architecture. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

## Responsibilities for solution architecture

- Combining industry and technology relevance with strong delivery experience and capability specific to CMT
- Engaging in the CMT community to foster a sense of collaboration and support to drive mutual professional growth
- Manage a team of Solution Architects and Application System Administrators, based out of Phoenix, AZ, Pleasanton, CA, and Manila, Philippines, for the design, development, implementation and support of system and infrastructure aspects of applications
- Applications used by the portfolio include PeopleSoft ERP, Lawson ERP, Workbrain, Empower, Mainframe applications and other COTS & SaaS applications
- Establishes strong alignment with project and delivery organizations to position solution architects as the technical partner to project and program managers for project delivery
- Demonstrate a proven track record of successfully managing large technology project-portfolios while maintaining accountability of deadlines and value propositions
- Identify software, hardware and non-functional requirements and ensure conformance of solutions to these requirements
- Optimize performance and provide support for application environment related issues
- Understand business strategy, objectives and stakeholders
- Understand contractual obligations and alignment to business capabilities

- 
- Must be willing to work out of an office located in Minnesota
  - Help prioritize activities of the larger team
  - Proven experience leading sales or pre-sales organizations preferred
  - Bachelors or equivalent degree in business or technical discipline
  - Extensive years of experience in multiple IT areas and relevant architecture experience
  - Possesses a general understanding of the systems and applications that enable business processes
