

Example of Staff System Engineer Job Description

Powered by www.VelvetJobs.com

Our company is looking to fill the role of staff system engineer. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for staff system engineer

- Develop proof of concept of the streaming client library
- Work cross-functionally with other teams to make the new architecture into production
- Design and improve the biometric sensing methodology
- Understand algorithms in biometric sensing technology and identify time consuming blocks which requires dedicated DSP block
- Architect algorithm in a way suitable for digital design
- Create models in Matlab or C for simulation
- Evaluate and characterize silicon
- Schedules to meet sub-system technical milestones
- Requirements verification
- Architecture/schematic

Qualifications for staff system engineer

- Experience working in the renewable energy industry in general and solar in particular
- Experience in balance of system development for Residential and Commercial market
- Experience in battery energy storage systems and associated industry standards
- In depth knowledge of NEC, UL 1741 and IEEE 1574
- Experience with Arena PLM software
