Our company is growing rapidly and is looking for a statistical analyst. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for statistical analyst

- Perform the technical analysis of the Field Failure data
- Summarize failure statistics and create weekly/monthly Project/Product performance reports for the assigned global Projects
- Interface/support the 'RAM/Failure Analysis Engineer', 'RCS Global RAM Team' and, if/when necessary, the other members of the 'RCS RAM Network' (located in the various Regions) for all the RAM KPI topics
- Support the APAC Warranty team leader to provide relevant RAM information upon request
- Become an expert at Acurian's proprietary predictive model
- Develop and maintain statistical formulas for future resource planning
- Coordinate authorization process and documentation for statistical formulas
- Participate in test vehicle quantity planning activities for the current and future models
- Act as a liaison between engineering managers, senior managers, division directors, and department management in budget and business activities to ensure optimal operational performance with minimum supervision
- Participate in planning and execution of departmental business plans and adhoc projects based on Project Management Concept

Qualifications for statistical analyst

- Demonstrated analytical skills in prior roles and ability to work independently and to drive a high quality of forecast

- SAP APO & SAP DEP experience are advantages
- BA/BS in Statistics or Social Science Research
- Experience in applied statistics in a business/marketing setting
