

# Example of Strategic Consultant Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is searching for experienced candidates for the position of strategic consultant. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for strategic consultant

- Provides action alternatives for improvement as appropriate
  - Assumes primary responsibility for client relationships and BD strategies
  - Leads development of BD strategies, win plans, and go/no-go decisions, working closely with inside sales and operations throughout BD process
  - Leads development of proposals, as needed to support BD process
  - Tracks and shares client relationship developments with management team through call reports and BD database entries
  - Negotiates contracts, with support from operations, legal, and contract groups
  - Works with BD and operations teams to assess resource availability and assemble project teams
  - This role may also be involved with creating new solutions and policies at a Corporate Governance level and will be the primary influencer of standardized solutions that are shared throughout all of Turner
  - This role will provide tactical support for Turner's instrumentation efforts, including gathering requirements, providing technical documentation demonstrating how solutions will work and be implemented, providing analysis for troubleshooting and reporting, and will be the curator of analytics instrumentation documentation
  - The Strategic Implementation Consultant will be the 'shepherd' of the analytics instrumentation processes for Turner's digital products
-

- Ability to interact with all levels within the organization external partners
- 3+ years experience in Data Strategy, Instrumentation Integration and Digital Analytics fields
- Experience with digital media analytics, including Nielsen and comScore toolsets and methodologies
- 2 or more years of progressive experience in provider-related support activities focused on collection, maintenance, reporting and/or interpretation of health care data and population health analytics
- Prior responsibility for the use of data management systems in a complex payer and/or provider environment
- An understanding of health plan finance and compensation arrangements between health plans and providers is fundamental to this role (e.g., plan funding, risk management and provider reimbursement)
