

Example of Strategy & Execution Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is hiring for a strategy & execution. If you are looking for an exciting place to work, please take a look at the list of qualifications below.

Responsibilities for strategy & execution

- Prepare deep dives on warehouse performance and cost data to identify areas for cost savings or address other questions
- Provide end-to-end program management of key initiatives in support of the Global Client business
- Evaluating the performance of the 2017 GTM operating plan for Cloud LoBs and identifying GTM strategies for optimizing short-term and long-term performance
- Personally participating and leading GTM strategic initiatives – with a primary focus on the Cloud - that involve the current GCO GTM, including (but not limited to) Regional and LoB GTM business performance, sales coverage, sales compensation, and rules of engagement across teams and resources
- Partnering closely with global, regional, and LoB business executives on the GTM initiatives outlined above so that the stakeholders view this individual as adding value as a key GTM thought leader and trusted advisor
- Drive strategic initiatives to successful conclusion and quantitatively and qualitatively monitoring the performance of GTM initiatives across 2017 and 2018
- Interact closely with members of the Global, regional, and LoB GTM community to build a dialogue around long-term GTM planning for GCO across 2018-2020, particularly in the continued transition to the Cloud
- Potentially participate in the 2018 GTM planning initiative, which will begin in September
- Leverage Operations and Franchise tools and resources to support

- Independently manage multiple projects at the same time and drive projects in a proactive and productive manner

Qualifications for strategy & execution

- 3-6 years' experience at a top management consultancy or "big 4" consulting firm
- 2 + years of experience in operations or marketing
- 4 + years of work experience with 2 years in Project Management or within an Operations role
- Extensive experience with programming languages, such as Python, JAVA, VBA and/or SAS
- Management consulting, strategic planning, corporate strategy, business unit strategy experience
- 10+ years of relevant, professional experience, ideally within Life Sciences, Pharmaceutical or Chemicals markets
