Our company is hiring for a technical product owner. To join our growing team, please review the list of responsibilities and qualifications.

Responsibilities for technical product owner

- Collaborate with Product Management on constructing a clear Product portfolio of features and initiatives
- Create, maintain, and refine the product backlog
- Convey the vision and goals at the beginning of every Iteration and Release
- Inspect the progress at the end of every iteration through demonstrations
- Accept scrum teamwork
- Work in close conjunction with the UX team to produce a world-class experience
- Act as the primary Product Owner from our main product lines
- Participate in internal workshops to define and initiate projects, assisting the Solution Architecture team and Project Managers to identify product dependencies
- Support the product technical team and engage the UI design team to bottom out product designs
- Project coordination/Project Management related activities as needed

Qualifications for technical product owner

- A technical mind-set and willingness to constantly learn and create new things
- A goal-oriented and proactive approach to work
- Excellent cooperation and team-working skills
- Making recommendations to the Senior Product Owner regarding product vision and roadmaps

- Selection of project delivery methodology (Agile/Waterfall)
